ABOUT US

We have an experienced and highly skilled team of engineers, technicians, and consultants who can provide professional advices, products and services to our clients.

Mechanic Electric - Electronic and Commercial International Company Limited (MEC International. Co., Ltd.), with more than 20 years of experience in the construction industry, is one of the most prestigious MEP contractors in Vietnam, and is accredited with the Quality management ISO 9001:2000 standard.

HISTORY

ESTABLISHMENT

MEC was first established (in 1993) as a mechanical, electrical and electronic service center by Mr Ha Huy Dung along with a team of 20, who at the time were engineers and technicians at the Vietnamese National Center for Technological Progress, which belongs to the Institute of Applied Technology in the Ministry of Science and Technology of Vietnam. The team got separated from the government, official became privately owned in 2001, under the name Mechanic Electric – Electronic and Commercial International Company Limited (MEC International. Co., Ltd.).

*20 years of providing superior quality projects
which withstand the test of time.*

STEPPING UP

One of the first big projects completed by MEC was the Victoria Sapa Resort & Spa in 1996, in which we were the General MEP contractor. During the tender process, MEC impressed the client with our professional and meticulous working style. By carefully studying the local climate as well as the lifestyle of indigenous people, we were able to come up with a fresh design idea which was much more affordable than other tenders. Upon completion of Victoria Sapa, MEC were invited by the same investment group to join two other resorts: Victoria Can Tho and Victoria Hoi An.

MEC CAMBODIA

In 2000, MEC was invited to join the construction of La Residence D'Angkor Resort & Spa in Siem Reap, Cambodia. The success of this project became the foundation for our expansion in both geography and brand name in the South Eastern Asia region. MEC official open a branch in Cambodia in the end of 2001. Following the event was a series of resorts, supermarkets, high rises, churches and factories in Vietnam and Cambodia. Our company steadily affirms our brand of quality and dedication throughout the years.

PRESENT AND FUTURE

At the moment, MEC is a well-known firm with a prestigious reputation. Therefore, we constantly refresh ourselves through studying and seeking innovations, fresh ideas or new sustainable equipment, as well as regularly investing in human resources to continue providing outstanding quality products and services to our customers.

Our future goal is to expand the market to the surrounding regions, offer quality products and services to other nations, thereby promoting MEC's brand name as well as affirming Vietnamese's product, service reputation and prestige in the international market.

LEADERS

MEC values diversity.

We have a mix of people with very different perspectives and from many cultures, working together, learning from each other and generously sharing their knowledge and ideas.

Our team of over 100 staffs all has one united goal which is to provide the best and most comprehensive MEP services to the clients. With this team of highly qualified professionals who have had years of experience living and working abroad, MEC is proud of our ability to communicate and work effectively in multiple foreign languages including English, French, Russian and Cambodian. Our employees are constantly updated and given training sections to catch up with cutting-edge technology, modern software and communication skills. All of this aim to offer great experiences and absolute satisfaction to our partners.

CLIENTS & TESTIMONIALS

Romain Brenas
Director of IN/ON (Cambodia) Co., Ltd

"... I am writing to recommend MEC International Company for its performance and quality of its work for the LDS Church project in Kampong Cham, Cambodia. MEC has shown professionalism and strength during the whole duration of the construction and has always cooperated with the project management, the architect or the client, even when the conditions were difficult..."

Nguyen Van Loi
Director of Evening Star Company (ESC., LTD)

"...During the execution of the Starcity Nha Trang hotel, MEC has demonstrated to be a prestigious and professional Contractor in work. All works have been completed by the Contractor on time and in compliance with all regulations on safety. We are impressed with the discipline and management style of MEC..."

Dang Tat Thang
Deputy General Director of FLC Group Joint Stock Company

"...MEC International has shown the cooperative and professional spirit to operate the Alacarte Sam Son hotel smoothly, and satisfied our requirements for aesthetics, safety and project progress. We are satisfied with the working manner of MEC in this project. We hope to continue the co-operation in coming projects."

COMPREHENSIVE SERVICES

CONSULTANCY

MEC offers different services at MEP Engineering; therefore our first action is to help clients decide exactly what they need. In the very beginning, our clients are invited to engage in an open discussion about goals and project purposes. We give them our undivided attention and take this job extremely serious.

From that conversation, objectives, budget, timeline and return on investment expectations are revealed. Once everything is clear, we focus our engineering expertise to provide the right solutions to meet those wishes.

DESIGN

We are committed to provide cost-effective solutions.

Our consultants and engineers always consider factors such as local climate, social condition, surrounding community lifestyle, etc. to recommend strategies that can achieve maximum cost savings, respecting Vietnamese International standards. With years of experience in MEP, MEC has formed a team of professional engineers who are in charge of consulting and design to meet the actual needs of customers.

EQUIPMENT SUPPLY

MEC only recommends equipment that will best fit with the specific requirements of the project, irrespective of brand names or supplier alliances. For us, a high-end project is not about using expensive products, but the right one, along with quality design and construction. We support our suppliers through creating clusters in which everyone can benefit and grow, with regard to the community and environment.

PROJECT SUPERVISION

Our project supervision department is responsible for supervising, controlling, cost estimation and other services to take care of customer needs. With nearly 20 years of experience in this field, in which MEC has successfully supervised many international construction projects with tough standards, we are proud of our capability to supervise and monitor complex MEP projects.

SYSTEM INSTALLATION

We have a large number of engineers and technicians who are technically skilled, hardworking, well-trained. Our project managers have engineering degrees, management certificates and many years of experience in the field. They are responsible and alert and strictly follow standard procedure to ensure safety and quality. With ISO 9001 quality management certificate and superior field experience, MEC always strives to go beyond expectations.

WARRANTY AND MAINTENANCE

We always put the task of customer care on top. MEP services and equipment provided by us are always warranted, maintained according to manufacturer's standards and specifications. We hope to build long-term relationship with our clients by providing the most professional support post-sale services. Our technical team is always ready to help whenever our customers ask for.

PRODUCTION AND MANUFACTURING

HUY HUNG MECHANICAL COMPANY

Huy Hung Mechanical Company is one of the branches of MEC.

The mechanical workshop was established in 2000 with the original purpose of supplying directly to MEC. With a team of experienced and skilled technicians, skilled workers, this mechanical workshop has become a large manufacturing company, and has engaged in production and installation of mechanical products for many large scale projects in Vietnam and abroad.

Huy Hung Mechanical Company is specialized in producing mechanical products for electronics, industrial electricity, civil electric, automation, machine building, agro-forestry processing and other fields.

SUSTAINABILITY

ENVIRONMENTAL DESIGN

For us, sustainable development is the right direction for all industries. MEC is proud to have participated in the projects that carry Lotus certification (Vietnamese certificate for green buildings) and we also have AP Lotus advisers who can provide the right strategies to save energy consumption, improve wellness of consumers and reduce carbon footprint.

We are always on the lookout by identifying our clients' sustainable goals; considering their lifestyle, analyzing the consumption habits and from then set goals that are feasible. After gathering enough information, we will offer advice that is consistent with client's desires regarding sustainability and energy-efficient. MEC's primary focus is to research and appropriately take advantages of natural-potential energy sources and use recycled resources to reduce artificial energy and waste. By doing so, we can minimize negative impacts on health and the environment through out the life cycle of a project.
